

模块化 Modularization

模块化端部组件 Modularized end components:

- 相同规格的模块化端部具有结构及尺寸的统一性及互换性。
Both constructions and sizes of modularized end components with same specifications are uniform and interchangeable.
- 工装化生产。
Produce with tools.
- 具有通用的传感器模块安装方式。
Universal installation means for load cell modules.

模块化秤体 Modularized scale body:

- 部件模块化，保证秤体结构的同一性。
Modularized components ensure the identity of body construction.
- 相同规格的模块可以根据需要进行互换。
Modules of same specification can be exchanged as required.

传感器模块:

- 具有通用安装功能的上下连接件。
Up and down connections can be installed universally.
- 适用于桥式、柱式等多种传感器的安装。
Suitable for installation of load cells with bridge type and column type, etc.
- 下连接件具有独特的位置调整功能。
Down connections has a unique function of position adjustment.
- 独特的防旋转及导向设计。
Unique circulation proof and guide

标准化 Standardization

标准的宽度系列 3/3.4米 Standard width 3/3.4m
标准的长度系列 4.5/6/7米 Standard length 4.5/6/7m

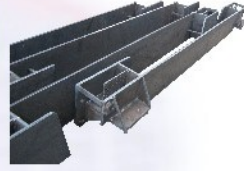

系列化 Serialization

标准的模块化秤体可以组合成不同宽度及长度的系列化产品。
Standard modularized scale body composes serial products with different width and length.
